

AVENUES CURB & GUTTER SURVEY

IMPACTS TO ON-STREET PARKING

Week of October 13th 2025 8 a.m. to 4 p.m.

Project Details

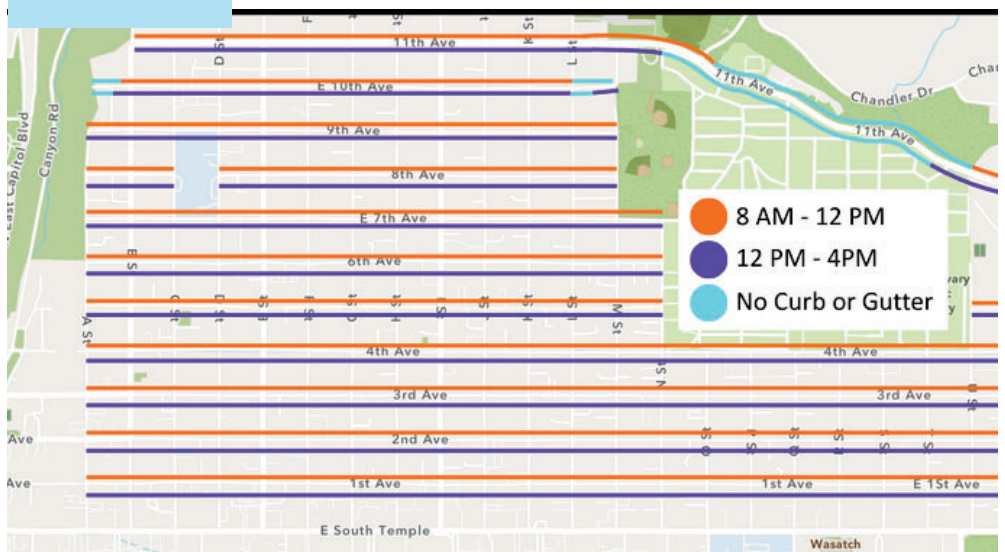

Salt Lake City Engineering is partnering with Roadway Asset Services (RAS) to conduct a pilot curb and gutter survey in the Avenues. The information we collect will guide future repairs in the neighborhood. The survey team will be working on bikes first surveying east-west roads, then north-south roads to move quickly through the entire area.

No on-street parking will be allowed during the survey.

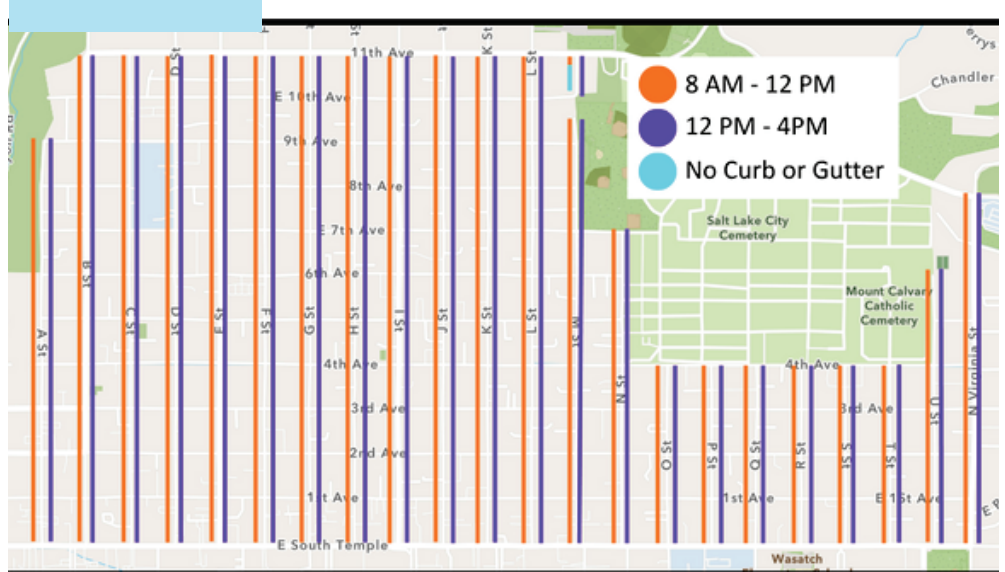

Vehicles will not be towed. Streets must remain clear of vehicles so the survey team can collect accurate data. No construction is associated with this project. Your cooperation will help us better understand where repairs are needed.

Thank you for your support!

East-West Streets

North-South Streets
